crusader kings ii warriors of faith unit pack. crusader kings ii warriors of faith unit pack

Paradox DLC is like a papercut. The more you purchase the more it hurts.. In my humble Opinion these portrait packs are worth the money for a few reasons based on my experience: 1) I like to play as Pagan or Muslim and have 4 wives, I then go and get a wife from each corner of the globe through raiding, is possible all 4 princess. 2) There are modes that require these files for top grade 10/10 wives to pillage from all corners of the world. 3) the system I use to rate is \$1 = 1 hour. 4) Indie companies don't make as much as AAA developers and if I can spend \$1 to get future content for a game I love I will support it.. Gods damn you Paradox, you make such great games but you ruin it by constantly releasing these packs for little images when its quite obvious it should be a free DLC.. A nice add-on for flavor.. A nice add-on for flavor.. .you're going to make me pay for my holy warriors to look the part? GTFO.. Gods damn you Paradox, you make such great games but you ruin it by constantly releasing these packs for little images when its quite obvious it should be a free DLC.
